

More flexibility

OptiLife nasal mask gives you and your patients more flexibility than ever.

With updated features and more options, it's now simpler to fit more patients with a mask that's not only right for their lives ... it's a great fit for yours.

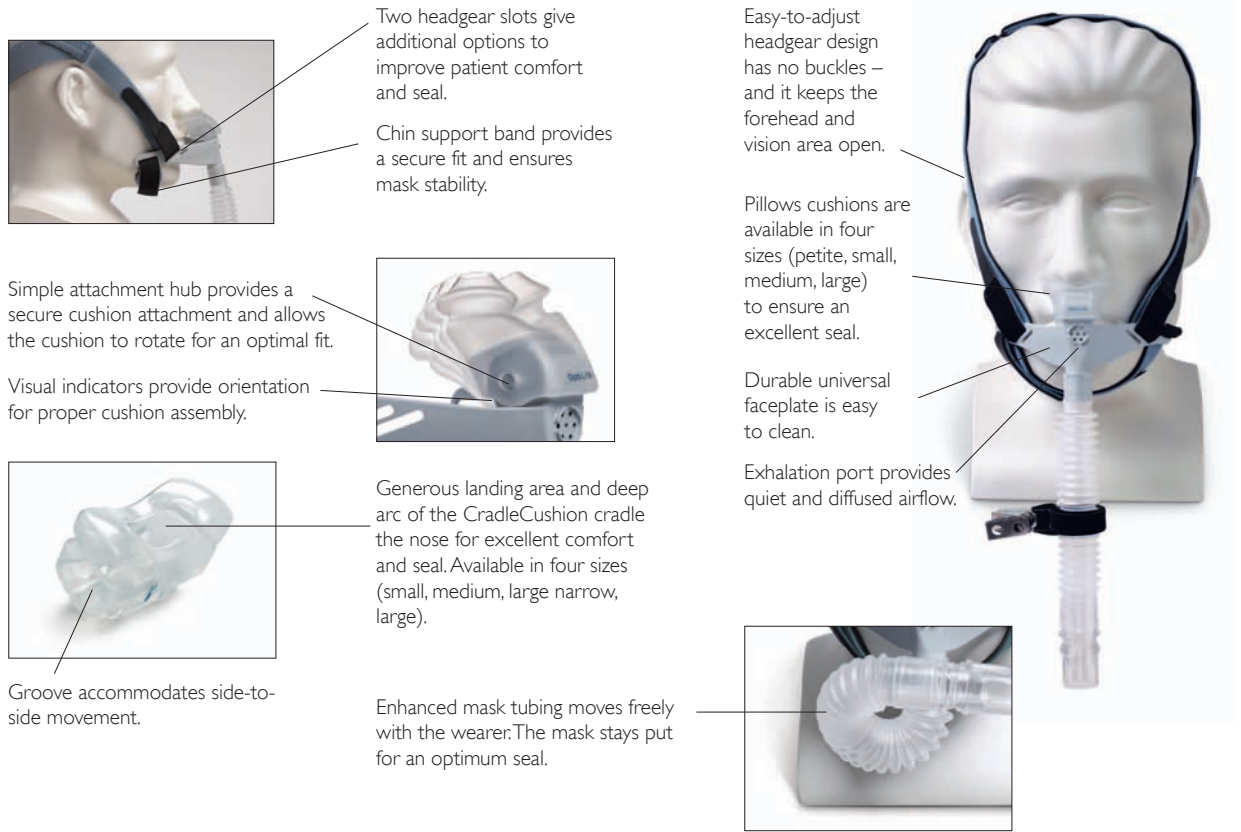

Now OptiLife wearers can choose between a pillows cushion or a new nasal CradleCushion style that literally cradles the nose to provide excellent comfort and seal. And because OptiLife is packaged with multiple cushion styles and sizes, first-time fit is straightforward, inventory management is enhanced, and callbacks are less likely for homecare providers.

Patients will appreciate how easy OptiLife is to wear, clean, and maintain – not to mention that they have a clear field of vision and can sleep on their sides. OptiLife can be slipped into place with just one hand thanks to an advanced headgear design and an integrated chin support band. Adjustments are simple, too. Updated mask tubing provides increased flexibility and a secure fit, regardless of sleep position.

OptiLife continues to provide great freedom. Now, with even simpler, more sensible features, you and your patients have more flexibility than ever.
